

DISTRICT TECHNOLOGY USE AND INTERNET SAFETY POLICY

The Board of Education of Marion Community Unit School District No. 2 hereby determines that it is in the best interests of the District, its personnel and its students, and members of the community to promote use of and familiarity with the District Technology and with the services which are available through that Technology to support learning and enhance instruction, and to improve communications between the school and community.

Knowledgeable and appropriate use of the District Computer Technology can facilitate access to information resources available on-line, create innovative learning environments, and provide for worldwide communication. For purposes of this policy, implementing rules, and acceptable use guidelines, the term "District Computer System", "Technology" or "System" shall include all computer hardware and software owned or operated by the District, any Technology capable of accessing web sites or other information not readily available at the District, District electronic mail, District web sites, and District on-line services and bulletin board systems. "Use" of the District Technology shall include use of or obtaining access to the Technology from any computer terminal or other electronic media whether or not owned or operated by the District.

The District's Technology was established to comprise part of the school curriculum, and is intended by this Board to function in support of that curriculum and of students' mastery of the curriculum through improved communication between the school and students' parents or guardians. The District's Technology does not constitute a public forum. The District reserves and retains the right to regulate the content of and links to the District's Technology. The District also has the right to and does monitor use of its Technology. Except as provided by federal and state statutes protecting the confidentiality of students' education records, no user of the District's Technology has an expectation of privacy in connection with such use.

The Board of Education recognizes that although the Internet and other available on-line services afford access to legitimate sources of information for academic and educational purposes, they also enable access to materials which may be illegal, obscene or indecent, or otherwise inappropriate in the school environment. The use of elements of the District's Technology including the Internet shall be consistent with the District's educational mission and the curriculum adopted by the Board.

With respect to any of its computers with Internet access, the District will use technology protection measures to (A) protect minors against access through such computers to visual depictions which are obscene, constitute child pornography, or are otherwise harmful to minors, and (B) protect all users against access through such computers to visual depictions that are obscene or constitute child pornography.

The Board of Education further recognizes that the effective operation of the District's Technology depends upon the existence and enforcement of guidelines for the efficient, ethical and legal use of its resources. The Administration is authorized to and shall adopt and enforce guidelines which limit the use of the Technology to educational purposes, and describe acceptable and ethical use of the Technology.

The guidelines shall, among other points, address:

- Access by minors to inappropriate matter on the Internet and World Wide Web;
- The safety and security of minors when using electronic mail, chat rooms, and other forms of direct electronic communication;
- Unauthorized access, including "hacking" and other unlawful activities by minors and other users online;
- Unauthorized disclosure, use, and dissemination of personal identification information regarding minors; and
- Measures designed to restrict minors' access to materials harmful to minors.

Such guidelines shall be distributed to District employees and students [and other members of the District 2 community] who are afforded access to the Technology. Violation of the acceptable use guidelines shall be subject to consequences including but not limited to discipline, loss of Technology use privileges, and referral to law enforcement authorities or other legal action in appropriate cases.

GUIDELINES FOR ACCEPTABLE USE OF DISTRICT COMPUTER TECHNOLOGY BY A STUDENT

A. Acceptable Use

All users of the District's Technology ("Technology") must comply with the District's Acceptable Use Guidelines, as amended from time to time.

The "Technology" shall include all computer hardware and software owned or operated by the District, any Technology capable of accessing web sites or other information not readily available at the District, the District electronic mail, the District web sites, and the District on-line services and bulletin board systems. "Use" of the Technology shall include use of or obtaining access to the Technology from any computer terminal whether owned or operated by the District.

Students have no expectation of privacy in their use of the Technology. The District has the right to access, review, copy, delete, or disclose, as allowed by law, any message sent, received, or stored on the District's electronic mail system. The District has the right to and does monitor use of the Technology by students, including students' access of the Internet, as part of Technology maintenance and to determine whether the use is consistent with federal and state laws and District policies and guidelines.

B. Privileges

Access to the Technology is provided as a privilege by the District and may be revoked at any time. Inappropriate use may result in discipline, including loss of Technology use privileges.

The Technology, including all information and documentation contained therein, is the property of the District except as otherwise provided by law.

C. Prohibited Use

The uses of the Technology listed below are prohibited and may result in discipline or other consequences as provided in section H of these Guidelines and the District's Student Discipline Code and rules. The Technology shall **not** be used to:

1. Engage in activities which are not related to District educational purposes or which are contrary to the instructions from supervising District employees as to the Technology's use.
2. Access, retrieve, or view obscene, profane, indecent or other otherwise not suitable for school district purposes. "Indecent materials" are those materials which, in context, depict or describe sexual activities or organs in terms patently offensive, as measured by contemporary community standards. "Obscene materials" are those materials which, taken as a whole, appeal to the prurient interest in sex, which portray sexual conduct in a patently offensive way in which, taken as a whole, do not have any serious literary, artistic, political or scientific value.
3. Access, retrieve, view or disseminate any material in violation of any federal or state laws or regulation or District policy or rules. This includes, but is not limited to, improper use of copyrighted material; improper use of the Technology to commit fraud or with the intent to

commit fraud; improper use of passwords or access codes; or disclosing the full name, home address, or phone number of any student, District employee, or Technology user.

4. Transfer any software to or from the Technology without authorization from the System Administrator.
5. Engage in for-profit or non-school sponsored commercial activities, including advertising or sales.
6. Harass, threaten, intimidate, or demean an individual or group of individuals because of sex, color, race, religion, disability, national origin or sexual orientation.
7. Disrupt the educational process, including use that is reasonably foreseeable to result in a disruption, or interfere with the rights of others at any time, either during school days or after school hours.
8. Disrupt or interfere with the Technology.
9. Gain unauthorized access to or vandalize the data or files of another user.
10. Gain unauthorized access to or vandalize the Technology or the computer system of any other individual or organization.
11. Forge or improperly alter electronic mail messages, use an account owned by another user, or disclose the user's individual password or that of another user.
12. Invade the privacy of any individual, including violating federal or state laws regarding limitations on the disclosure of student records.
13. Download, copy, print or otherwise store or possess any data which violates federal or state copyright laws or these Guidelines.
14. Send nuisance electronic mail or other online messages such as chain letters, pyramid schemes, or obscene, harassing or other unwelcome messages.
15. Send mass electronic mail to multiple users without prior authorization by the appropriate District Administrator.
16. Conceal or misrepresent the user's identity while using the Technology.
17. Post material on the District's web site without the authorization of the appropriate District administrator.
18. Engage in activities which attempt to bypass Internet filtering installed by the District.

D. Web sites

Unless otherwise allowed by law, District web sites shall not display information about or photographs or works of students without written parental permission.

Any web site created by a student using the Technology must be part of a District-sponsored activity, or otherwise be authorized by the appropriate District administrator. All content, including links, of any web site created by a student using the Technology must receive prior approval by the classroom teacher or an appropriate District administrator. All contents of a web site created by a student using the Technology must conform with these Acceptable Use Guidelines.

The District may discipline a student whose personal web site causes, or can reasonably be expected to cause, a substantial disruption of the school environment without regard to whether the web site was created using the Technology.

E. Disclaimer

The District makes no warranties of any kind whether express or implied for the Technology. The District is not responsible for any damages incurred, including the loss of data resulting from delays, non-deliveries, misdeliveries, or service interruptions. Use of any information obtained via the Technology is at the user's own risk. The District is not responsible for the accuracy or quality of information obtained through the Technology. The District is not responsible for any user's intentional or unintentional access of material on the Internet which may be obscene, indecent, or of an inappropriate nature.

F. Security and User Reporting Duties

Security in the Technology is a high priority and must be a priority for all users. Students are prohibited from sharing their login IDs or passwords with any other individual. Any attempt to log in as another user will result in discipline.

A user who becomes aware of any security risk or misuse of the Technology must immediately notify a teacher, administrator or other staff member.

G. Vandalism

Vandalism or attempted vandalism to the Technology is prohibited and will result in discipline as set forth in section H of these Guidelines, and in potential legal action. Vandalism includes, but is not limited to, downloading, uploading, or creating computer viruses.

H. Consequences for Violations

A student who engages in any of the prohibited acts listed above shall be subject to discipline, which may include: (1) suspension or revocation of Technology privileges, (2) other discipline including suspension or expulsion from school, and (3) referral to law enforcement authorities or other legal action in appropriate cases.

Misuse of the Technology by a student may be considered gross misconduct as that term is defined by the District Student Discipline Policy and rules, and a student may be subject to discipline pursuant to the Student Discipline Policy and rules. A student who believes that his/her Technology use privileges have been wrongfully limited may request a meeting with the building principal to review the limitation. The decision of the building principal shall be final.
